

HV-2E Fume Extraction system

Product Features:

A fume extraction system with two extraction arms that is both portable and compact. The main unit features strong fan performance with a pre-filter and an efficient standard filter, while being on lockable casters for easy maneuverability by one person. The internal pump system utilizes a quiet brushless, maintenance free centrifugal fan motor that efficiently removes fumes from the desired workspaces, while keeping noise to a minimum. The two 7ft. long flexible arms with 3.5" funnels can reach most work areas with ease and make it easy to reach workstations even if far apart from each other.

SPECIFICATION:

Input	100-120Vac 60Hz 220-240Vac 50Hz
Rating	320 W
Air flow	340 cubic metres/hour
Noise level	54-68dBA
Dimensions (H x D x W)	446x376x376mm
Weight	23Kg
