

High Power Programmable DC Power Supply PWS Series

Introduction

Programmable switching DC power supply PWS series cover large range of outputs, rated power from 1.8kW to 100kW, rated voltage up to 5000V, rated current up to 10000A.

IGBT module adjustment and PWM modulation facilitate PWS series with high efficiency, high accuracy and high stability. High gain amplifier circuit design makes PWS series with fast response. Improvement on circuits brings stronger anti-interference performance. Active air duct design and optimized cooling channels effectively reduce temperature rise.

Over Voltage Protection, Over Current Protection and Over Temperature Protection keep the PWS series and their load safe from unexpected conditions. For more complicated applications, the PWS series are available with many optional functions: remote sensing, remote ON/OFF control, timer switch, square waveform output, PV curve output, etc.

PWS series can be made to customer order. Please contact us for more details.
